

# CoffeeScript Notes

May 23, 2013

## 1 Overview

A clearer, more class- and list-friendly language that compiles directly to Javascript. Command line compiler is a Node.js utility. (`.coffee => .js`).

## 2 Scoping

Coffeescript protects from common scoping mistakes. You don't need to write the *var* keyword.

## 3 Cake

**Cake** CoffeeScript's build system. Like Make for C. The tasks of building are defined in the *Cakefile*
